PROVISIONAL ELECTION

COMMISSIONER FOR PATENTS

SIR:

In response to the Restriction Requirement dated September 8, 2003, Applicants elect Group I, Claims 1-8, drawn to an apparatus for forming a coating film on a substrate, classified in class 118, subclass 52.

The Restriction Requirement asserts that the application contains claims to patentably distinct inventions. However, MPEP § 803 states the following:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.

Although the outstanding Official Action does identify two different search classifications, it is believed that the claims of the present application would have to be searched in only a small handful of sub-classes. Furthermore, since electronic searching is commonly performed, a search may be made of a large number of, or theoretically all, subclasses without substantial additional effort. Accordingly, Applicants respectfully traverse the Restriction Requirement on the grounds that a search and examination of the entire

application would not place a *serious* burden on the Examiner, whereas it would be a serious burden on Applicants to prosecute and maintain three separate applications.

Therefore, it is respectfully requested that the requirement to elect a single group be withdrawn, and that a full examination on the merits of Claims 1-12 be conducted.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
